

Bioactive[®] Toilet Paper

On a roll to a cleaner planet

www.enviropius.co

Innovative paper that cleans pipes and septic tanks

Enviroplus Bioactive® Toilet Paper delivers unprecedented innovation through the incorporation of internationally patented BATP® technology. BATP® consists of a synergy of five natural micro-organisms, safe for personal use and the environment. The micro-organisms only activate when in contact with water, and produce enzymes that biodegrade encrustations and organic substances present in pipes and sewage systems.

Enviroplus Bioactive® Toilet Paper prevents unpleasant odours, cleans pipes, drains to reduce purging operations. By enabling constant wastewater flow it reduces the risk of sewage systems clogging. With regular use, you will start to see significant results in just four weeks, such as reducing sewage and septic cleaning and cutting down maintenance costs. With ongoing use of the paper, the cleaning action never ends.

✓ Enzymes are activated when in contact with water and degrade organic matter, resulting in cleaner pipes.

✗ Say goodbye to frequent pipe blockages. Maintains drains and cleans pipes, reducing purging operations.

✓ Environmentally friendly, PEFC™ certified paper. Treated with 100% naturally occurring, eco-friendly, non-pathogenic microorganisms.

✗ No more unpleasant odours in sewerage lines, including pipes, trap tanks, septic tanks and cesspools.

A natural solution for Australia's sewerage systems problem

Enviroplus Bioactive® Toilet Paper treated with B ATP® cleans, protects and maintains pipes and septic tanks

With regular use of Enviroplus Bioactive® Toilet Paper you'll have clean pipes in four weeks

About Enviroplus

Organically powered deep cleaning

Our extensive range of high-performing, organic cleaning solutions deliver powerful results for environmentally-conscious cleaners and facilities across Australia.

Enviroplus products are environmentally certified as they are made from naturally-derived, non-toxic ingredients. Whether it's resisting and preventing unwanted dirt and grime, protecting different floor types, windows and other surfaces, or removing odours, Enviroplus has an organically powered deep cleaning solution for you.

Minimising the commercial impact on the environment is a primary focus of the range. With this comes the added advantage of improved waste management opportunities and cost effective business practices.
